MY STAY IN SLOVAKIA

In my stay in Bratislava for one week, I got a lot of experience. I met new students from Slovakia. They were good and they showed us many places in the city especially the historical places and they told us more about their country in old times, how their country built economically, politically and socially. The students were good and friendly. They think that we were guests, and they make time for us even if they were busy of school. I really respect that and I would like to thank them for what they did for us. I hope the same hospitality and respect will happen to them when they come to Norway for a visit.

City of Bratislava has many old buildings from the middle age and this makes the city popular for tourist attraction. I got the chance to visit different historical places such as Bratislava Castel, which is located in the center of the city, and an old castell, which is out of the city around 40 minutes by buss and we visited the memorial statue for soldiers who died in the war.

The students are good in physics and mathematics; I have seen many diplomas on the walls from Olympiad competition in many subjects from the past years. In Bratislava, students have a competition in different sports called Olympic Games. They arrange the competition every year and it is between different schools, which is not common in Norway.

All in all, I liked my stay in Bratislava. It was a good experience. I hope I will visit the city again in the future. Finally, I would like to thank all people who arranged the school trip. ☺ ☺ ☺

I loved Bratislava for many things. Old buildings, beautiful statues and nice people make the city more beautiful.

I really loved their old castle we visited. It surrounded by forest, river and small villages. It is exciting and amazing.

In Bratislava, things are very cheap when we compare with the price here Norway.
