MY STAY IN SLOVAKIA

Our trip to Bratislava started at Gardermoen where all the students met up, tired as always even though the time was about 12. The whole group was filled with anticipation of what was to come. Slovakia is not a country well known in Norway and most of us wonder about how the people would be and what things we could do. We landed in Vienna and took a buss to Bratislava. We arrived at hotel Ibiz which lay close by the beutiful castle.

When we first visited the school i was taken by surprise by how friendly and forthcoming the students and theachers were. And that still amazes me, in Norway we would probably be friendly to them but we would not do more than what the school required. Me and some friends were invited out to see the town and got ourselves a ‘‘toured‘‘ guide of the city. That was a nice thing to do and we would never have visited the things they showed us.

Another interesting thing was that we got to experience how it is to be a student in Slovakia. Cmopared to Norway things were very informal. In Norway we have a strict schedule on what we are supposed to do, in Slovakia it was more relaxed.

We also got to see the Red Stone Castle which is a stone castle from the 13th century. The castle itself was beutiful and we had a wonderful guide.
All in all it was a great experinece and i am thankful for the opportunity to particiapte in this program.

What did I like the most...
The thing I liked the most was the people. Everyone was so friendly and forthcoming.

The most interesting was to experince how it is to be a student in Slovakia. It really was a fun experinece and it was very different from being a student Norway.

The biggest difference was how much things cost. Comopared to Noway things were increbibly cheap.

The biggest surprise was how warm and welcoming everyone were. This is nothing like how people behave in Norway.
