MY STAY IN SLOVAKIA

We staid in a very nice hotel in Bratislava, witch is the capital of Slovenia. The hotel l very close to the Bratislava Castle, so we had an amazing view.

We where at school 4-5 hours a day, and the time went very quickly. My roommate and I did not have physics and math so we worked with other homework, so that we did not have too much to catch up on. I attended one biology class, and one English class. The biology class was very different from what we learn in Norway. We have never learn about a specific speech, but at least now, I know a lot about the water spider.

When we were not at school, we went sightseeing. We went to two different castles. Bratislava castle and the red stone castle. I liked the Bratislava castle the most because it was better organizes, and the guide knew a lot about the different exhibitions.

I really enjoyed my stay, and it was nice to meet new people, and visit another part of Europe than I usual do. I learn a lot about Bratislava and Slovakia

What did I like the most...
I liked the shopping malls Eurovea and Eupark. There were shops we do not hvae in Norway, and evrything was werry cheep.

The most interesting was...
Playing laser tag in space world, and visit the different museums.

The biggest difference was/is...
The streets all of a suden smelled like sewer.

The biggest surprise was…
The school looked was very nice and they had warm meals every day.
