MY STAY IN NORWAY

Norway, such a mysterious country for me. I heard many different things about Norway. So my exceptation was so big.
After mobility I can say Norway is a beautiful country. The best thing about Norway is their
Norwegian cleanliness. There is no mess. Almost every building is seen like new or just reconstructed.
Another interesting discovery was Norwegian young people are really interested in politics. They are also contented with their politicians! That is absolutely amazing because I think only a few countries can say, they had good government. In Norway there is a common 80% poll in the elections. 80%!! In Slovakia is maybe 35%. Students there have opinion and that is so important to nowadays world. You can discuss with them about any topic. So I really enjoyed our workshops.
If I want to recap all my impressions in one sentence it will be: I love Norway because everything works well there, including government, education, public transport, tourism and many other things.

We started at our lovely train station in Bratislava. We boarded on train to Prague. It lasted 6 hours. It was funny because our flight to Oslo took only 2 hours. Wonder of planes. We landed in Oslo and from there we went to Drammen by train. First day we only walked around our hotel. That hotel was amazing by the way. You got there free coffee and tea, gym, conference room and many others conveniences. We also had brilliant food there. I fell in love with their smoked salmon. Second day we went to town for a long walk. There was a many nice things but the best was two giant blue circles on one island. We have taken many photos there (also many profile pictures were made there). And also we went up to the hill to see a panorama of the city. There was a beautiful lake. Next day we went to Oslo by bus. We started in an old silver mine. We walked through whole mine. After that we went to see Ski Jump. It is an unbelievable building. Great architecture realization. And finally after Ski Jump we went to Oslo. We started at Oslo`s gardens full of naked statues and latino dancers. We danced there and I think it was one of best moment of our trip. Downtown of Oslo is not as our European capitals. It had only a few historical buildings. There is so much new monuments like Opera House. Opera House is one of the most beautiful building I have ever seen. It raised up from sea with its white coldness and geometrical shapes like some giant yacht.
Next days we started at Norwegian school. It is completely different from our Slovak schools. We enjoyed every day because it was pleasure to be there. They have got theatre, gym, swimming pool, 3 football field etc. We also tried to swim there, water was so cold but I remember this foolishness until I die. Norway is stunning country. I want to travel there one day again, maybe next year. I also want to say thank to all who are interested in this wonderful project. My work paid off.
