MY STAY IN SLOVAKIA

Our trip to Slovakia was a great time, and i had a lot of fun. It was great to experience another culture and to speak with the slovakians about both of our cultures.

While in Bratislava i got to spent some time with my classmates and some slovakians. It was a great time, and the slovkians were really nice. Some of them showed us some of the places they like to hang out, and it was a great time.

The regiment the school had set up for us was quite good. We got a tour of the city, saw two castles, did some math and physics, and participated in the Gamca games.

One of the days we decided to go out and play laser tag. The entire class was there and it was fun. We got extremely sweaty though.

The food in Bratislava was quite good. We didnt taste a lot of dishes which only exist in Slovkia, but the food we had at the nearby restaurant where we ate dinner and other restaurants was great.

I would recommend this trip to all of next year's physics and math students. It was a wonderful time, and completely free. I would do it again if i could.

What did I like the most...
I enjoyed meeting new people from a different culture quite a lot.

The most interesting was...
Learning about slovakian culture was a lot of fun, and it puts things in a different perspective.

The biggest difference was...
The prices were the biggest difference between Norway and Slovakia.

The biggest surprise was…
Again, the incredible price gap.
