MY STAY IN NORWAY

What did I like the most...

I liked the most the whole school, especially the concert hall, gym, small theatre and exterior of the school as well. I also liked working in groups with Norwegian students.

The most interesting was...

The most interesting was cultural workshop, because we got to know our countries in many ways and we also could taste traditional food and drinks.

The biggest difference was/is...

The biggest difference was for example in duration of lessons and also in equipment of the school. Another difference was, that students in Norway, unlike us, don't have freetime activities at school.

The biggest surprise was…

The biggest surprise was for example the concert that Norwegian students prepared for us. Another surprising thing was, that all students in Norway get their own laptop and they don't have school canteen, so they have to bring their own lunch to school.

30 students from our school were chosen, according to essays we had to write every week and also acoording to some English tests. The first day of our stay in Norway, we visited Drammen, the city we were acommodated in. Next day we went to a local mine and gallery and the following day we visited Oslo. The first day at the school we have introduced our school, country and capital city and then Norwegian students told us something about themselves. Next days we had several workshops. For me, the most interesting one was the cultural workshop. We were talking in small groups about our traditions and then we were making a poster about a topic that was given to us. In this wokrshop, we could also taste traditional Norwegian food like brown cheese, salmon or apple juice. During the math workshop we were trying to solve some equations and other tasks. We also had political workshop, so we were talking for example about political systems or elections in our countries. Another very interesting workshop was English workshop where we were working on timeline of important historical events of our countries.

I think that we have learned a lot during this week, but I hope we have also inspired Norwegian students with our Olympic Games and other freetime activities, so maybe they can start doing something like this as well because the last day of our visit we showed them some disciplines from our Olympic Games and we had a lot of fun. I also really liked the concert they prepared for us the last day.

This whole experience was very interesting for me, not only because it helped me to improve my English, but I also got to know a lot of new people and the school system in Norway in general. I also know more about culture, food, political system and people in Norway. I can say, that this project gave new information, friends and great memories as well.
