MY STAY IN NORWAY

What did I like the most...?

The nature... there could be commonly found species that are not so often to be seen in our country. Also they have very different attitude to lots of things; they appreciate their forests and sources that they live on. The second thing is architecture, most of the buildings were quite modern. I really liked cities and roads which are amazingly spacious. I loved it.

The biggest difference was...

The character of Norwegians and their blue eyes with blond hair, different country, different people and habits. And also the time when was the Sun setting down. I couldn't believe it. To feel sunshine at half past ten was breathtaking.

We stayed in Norway for one week and for me, it was unforgettable time. The first day we went out to take a look on Drammen, where we stayed in hotel. We walked along the river and then in the afternoon we went to a nearby forest where we had an amazing view of the city. On monday we visited places like a huge open – air museum, The Vikings' museum, Holmenkollen ski jump, where I took some photos from the top. We all enjoyed the beautiful view. Then we visited The Vigeland Park, the variety and amount of the statues was very imposing and Oslo. The Oslo Opera House was absolutely impressive and walking on it was even more. The last three days we spent at St. Hallvard school talking to the other students about life in Norway and here in Slovakia trying to compare it, as well as searching for differences and things we have in common. We had workshops where we worked together on projects, for example making paper boats with dates, historical facts and events. We were solving mathematical tasks, discussing about history and famous persons, playing volleyball and football, presentating our own culture and habits and not in the last about national cuisines. We had even brought our typical foods and drinks for them and we also tasted theirs. It was really worthwhile week filled with experience and I will come back in memories.
