MY STAY IN SLOVAKIA

Project BraDraShip 12.10.2015 - 19.10.2015

This was my first time visiting Slovakia, and we staid at a hotel I Bratislava close to the school we made relationships with. I had a lot of fun, both with my Norwegian friends, but also the Slovaks. I think I am going to remember this trip for a long time.

The school was okay, it was difficult to learn everything in English though, especially math. We were not on the same level in the different subjects. We had math with people one and two years younger then us, but in for example English we were ahead of them. This just shows how different countries priorities their subjects and how important we think the subjects is.

We learned a lot from each other, and I felt the trip was absolutely worth it. Our traditions and cultures were a little bit different from each other and also our political views. Especially when it comes the migration cries we have in Europe right now. But it did not matter because we all have different points of view.

I am so glad I got the chance to go to Slovakia, I would absolutely do it again if I had the opportunity.

What did I like the most...
The people at the school. They were very nice to us and we had a lot of fun together. I want to go back and meet them some time in the nearest future.

The most interesting was...
To see the differences in our countries, culture, tradition, prices, and politics. We learned a lot about Slovakia at school trough presentations and tasks. We also tried to teach them how it was in Norway compared to Slovakia.

The biggest difference was...
The price tag on everything was probably the most shocking. I could find lunch 10 times cheaper there. But I also noticed that people on the street did not make space for each other. They just walked in front of each other and stopped in the middle of the street, not caring about others. Very different from how it is in Norway.
