# MY STAY IN NORWAY

**What did I like the most** was an interactive way of learning, discovering norwegian culutre and introducing our culture to Norwegians as well. I really did like the workshops we had, which gave us the opportunity to get to know Norwegian students, culture, habbits, political and economical situation.

**The most interesting was** the possibility to work and study with norwegian students. I did like that we did not had to study separately. Next thing i have found interresting was Norwegian school system and how everything works perfectly.

**The biggest difference was** teachers´ attitude. Norwegian teachers are both very friendly and authoritative in the same time. Of course, there are exeptions in our school/country but generally, teachers in Norway have better motivation how to teach.

**The biggest surprise was** how well equipped was school and each student has the opportunity to choose which subjects he or she wants to study, so they have very good conditions to study what they want in a professional way.

I knew from the beggining that our trip to Norway will be unforgettable. Just the fact we were travelling to country with highest standard of living was very exciting. And the fact that we will spend most of our time in Norwegian school and with Norwegian students was even more exciting. We got the opportunity to peer into life of ordinary people, young people, their lives and the most important thing, into Norwegian school system. We have found out that it is completely different than ours but i am not able to say which one is better. I think both of them have their pros and cons. I really did like the workshop form of learning new things about Norway. Workshops i did like the most were cultural and political. In cultural workshop we learned very much about Norwegian culture, traditions, food and habbits. On the other hand in political workshop we were introduced a little bit to the Norwegian politics. But the best thing was the cooperation with Norwegian students. We had to work in groups with Norwegian students. It was wery interresting because these cooperations gave us many different points of view on the same thing, the results were amazing and we had so much fun. I have learned that Norwegian students are very creative but in a different way than Slovakian, so I will try to use their way of thinking and combine it with my „Slovakian“ point of view to be better student.

The experience which we gave Norwegians is deffinitely our way of socialization, which is very different than in Norway. We showed Norwegian students how we spent our free time, and that many of our activities are connected with school. We introduced them our school Olympic Games which I think they did like very much and they were very interrested in it because it was something they have never seen before.
