MY STAY IN NORWAY

What did I like the most was the nature. It was so amazing. There was not as much pollution as in Slovakia, no cigarettes, only pure nature. I have to mention fjords that were one of the most beautiful natural pieces I have ever seen.

The most interesting was our trip to Oslo. I have never seen city like that. Opera, castle, ski jump and museums were very interesting. I can really imagine living in there.

The biggest difference was our everyday life. In Norway students go home directly after school and I think they have no fun at all. That is really different and I can´t imagine how it can be like.

The biggest surprise was when I have found out how much does pizza cost in Norway. I made some math and figured out, that one pizza in Norway costs like tickets to cinema with pizza for 3 people. It was really surprising that only for one pizza I have to work a few hours.

I have never flown before, so even the travel was really interesting for me. All the way there I was looking forward to meet some Norwegians. First few days we met more Slovak people than Norwegians, what was really weird. When we went to Oslo, or to some hill near Drammen, everywhere we met some Slovak or Czech people. Finally, on Tuesday we went to school and there were no Slovak people at all. We could finally talk to some Norwegian students. It was really big moment, when I could talk to someone so far away from my home. It was finally some real thing, when some adults started to talk to us. It was more like they saying some things, but I couldn´t talk to them, finding out things that really interest me. But finally in school I could, so I spoke to them as often as I could. And workshops helped me in communication. We had some topics and it was funny and interesting.

Before the trip, I wasn´t sure if I would be able to speak English so well, but I figured out that I really can speak English, because I have never spoken English before more than a few hours. Here in Norway it was a week, and my English got really better. What gave me the most was math workshop. I had to explain some math problems in English, what was really hard task, but I have learned very much only during one lesson.

Norwegian students were so great, funny and I had a great time with them. We went outside to see the city after school with them. It was more interesting than with some adults.

I was very sad when we had to go home and way home wasn´t so great than the way there. I can really imagine living in Norway and I really hope that one day I will.
