MY STAY IN SLOVAKIA

I had an amazing trip, and I met so many interesting people. I enjoyed every single moment, and I think it was a great experience. It was fun to hang out with students from so far away, and I learned a lot about their culture and education system. My favorite part about the trip was when we hung out with the Slovak students after school. They are very open and kind, unlike Norwegian people. I also enjoyed getting to know my classmates better.

I think the most interesting part about the trip was the debate. The Slovak students had an entire different view on the migrant crisis. It was also interesting that we almost did not see any migrants the whole week.

Another big difference from Norway was the prices. Everything, except shoes, were so cheap! I also found it strange how everyone just walked straight forward in the streets. If we did not move, we would collide with the Slovak people.

The biggest surprise was the environment. I expected things to be a bit shabbier, but the hotel and the streets were clean. I also expected seeing more hobos. I thought the Norwegian students and the Slovak students would not have anything in common, but we were actually quite similar! I enjoyed their company. Thanks for a great trip!
