MY STAY IN SLOVAKIA

Our journey to Slovakia was very nice. When we landed in Vienna, we drove the bus an hour to Bratislava, and witnessed an amazing sunset. There, we checked into our hotel, and after dinner, we could finally roam around in the city.

We spent the next few days at the school, where we met the Slovakian student. They were all different ages, and it was very interesting seeing how smart they all were and how much they loved math and physics. The warm lunch in the canteen was also a new experience for me, but it was very cozy.

Our guided tour in Bratislava was very cool. We walked through the old town, and the main square. And in the small streets, there were many cute restaurants and coffee shops. In addition, I got to see a lot of beautiful, old buildings, something I personally love.

During my trip to Slovakia, I have learned a lot, and experienced many new things that I hopefully will remember for the rest of my life. We have tasted many delicious, traditional Slovakian dishes, and have seen the differences in the culture, and the city.

I feel like my English has improved a lot, because we had to speak English the whole week to understand each other. I am very grateful for the opportunity to experience a country in this way, and meet new people from Slovakia. ☺

What did I like the most was the people. They were very friendly and welcoming. I also loved the city, because it had so many old buildings and a beautiful, big castle.

The most interesting was seeing the cultural differences between Norway and Slovakia.

The biggest difference was the difference in our schools. In Norway, we have computers for almost everything we do, but in Slovakia, they write everything by hand.

The biggest surprise were the prices. The food is very cheap, but the clothes had almost the exact same price as in Norway.
