MY STAY IN NORWAY

What did I like the most...
was the final musical concert that Norwegian students perfomed for us.

The most interesting was...
How modern equipped the school was.

The biggest difference was...
How large the campus of the school was compared to our school.

The biggest surprise was…
That movies and TV series on national television have original English dub and Norwegian subtitles.

The most delicious Norwegian thing I´ve tasted was… the caramel sheep cheese and milk chocolate that we were offered during our workshops.

This May, thirty students including me from Grösslingova Secondary Grammar School underwent project called BraDraShip. Participation on this project required students to write several essays in Slovak and English language and write two tests to show their English skills. The main goal of this project was to establish a partnership between Slovak and Norwegian school.

We visited Norway and attended workshops with Norwegian students from St. Hallvard videregående skole for one week. The workshops were always focused on different topic: politics, mathematics, English, culture, physical activities,.. During these workshops we worked in small mixed groups and discussed the topic together. My personal favorite workshop was the cultural one, when we got the chance to exchange and taste our and typical Norwegian food.

The highlight of our stay in Norway was the last day when the Norwegian students performed the musical concert and then we danced our folk dance 'Karička'. After that, we played together different games that are typical for the GAMČA Olympic Games.

During the days we weren´t at school we also went on some trips. We were sightseeing in Drammen, the place we lived in, and we were hiking in the near woods of Drammen. We also had two all-day trips. We went to the mine which was located nearby the capital and the second one was the trip to Oslo as well. In Oslo we visited an open-air museum, the Viking Ship Museum, Holmenkollen Ski Jump, Oslo Opera House, the Vigeland Park and historical centrum of Oslo.

Not only did I practice my English or got to know new people, but I also gained new experience, information, and knowledge during my stay in Norway. I have got to see and experience a new country and also got a insight to its culture.
