MY STAY IN NORWAY

I liked the most the silver mine and its history. Although, Oslo was great too. We did not learn much about Vikings but I found it interesting to see real Viking ships were an amazing experience.

The most interesting were days in school. I didn´t know much about Norway before but I have learned many things from students - we talked about traditions, culture, politics and history.

The biggest difference for me was the cities – atmosphere of them. They were also much cleaner, which is a thing I would like to see in Slovakia too.

The biggest surprise were some facts that I have learned about Norway – about Norwegian traditions or that a paperclip was invented in Norway.

We were on educational visit of Norway from 22.5.2015 to 30.5.2015. We visited Norwegian school, Oslo, The Silver Mines of Kongsberg and many more. Everything was such a great experience.

First day, we had a nice walk in beautiful Drammen. Then we went to The Drammen Spiral. On Sunday, we visited the silver mine. It was very interesting and we had a nice guide throughout the history of mine. We spent Monday in Oslo. We had time to see some really interesting things and places such as The Viking Ship Museum or the Holmenkollbakken. I was also impressed by the Oslo Opera House – mostly by its architecture. Also, Oslo had kind of different atmosphere than Bratislava – our capital. It felt a lot calmer and was cleaner.

We were in the St. Hallvard School for next few days. We met a lot of new people and shared information about Slovakia and Norway. I really liked workshops – we worked in teams with Norwegian students so we could get to know each other pretty well and it also improved my English. I have also learned many interesting facts about Norway. School system was a little different, but I liked it.

I was glad we presented our country as well. We presented our history, our school and The Olympic Games that are organized every year. Our stay in Norway was a great experience for me and I think it helped to improve my English. I hope I will come back one day.
